PROTECT SHIRT

STAY DRY FEEL SAFE

The Protect shirt by ISA bodywear prevents sweat stains under the armpits thanks to its innovative 3-layer technology. For people who suffer from excessive underarm sweating, the Protect shirt is the perfect solution: You'll no longer be worried out visible sweat stains under the arms, and will be able to feel secure and enjoy freedom of movement.

The base materials we use – Micromodal and cotton – form breathable, shape-resistant and very skin-friendly fabric, suitable for both summer and winter. Thanks to the deep neckline and the flat-seam finish, the shirt remains almost invisible under all tops.

The magic lies in the ingenious structure of the armpit zone with its innovative 3-layer technology that covers a wide area. Trevira fabric, which has antibacterial qualities while being moisture-permeable, lies directly on the skin, ensuring a dry feeling, while passing on moisture to the terry cloth. The absorbent core made of terry cloth soaks up and stores the moisture. A water-impermeable membrane on the outside prevents the moisture from leaking out, thereby preventing sweat patches.

The Protect shirt by ISA bodywear offers sufferers a new lease of life. They'll be able to wear colourful shirts and blouses again – without embarrassing sweat stains under the armpits.

Micromodal base material

Finest fabric made of high-quality LENZING™ modal, made of natural cellulose fibres.

- | | |
|---------------------------------|--|
| ✓ Efficient moisture management | ✓ Smooth surface, ideal for wearing under clothing |
| ✓ Quick drying | ✓ Elastic and keeps its shape |
| ✓ Breathable | ✓ Very skin-friendly and extremely low-irritation |
| ✓ Extremely soft and supple | ✓ 45% micromodal, 45% cotton, 10% elastane |

Well-designed structure of the absorbent surface

Really high effectiveness is obtained thanks to the combination of three different functional layers

A

Inner fabric

The Trevira inner fabric is extremely moisture-permeable for a dry feeling. The moisture is directed to the terry cloth.

Antibacterial

100% polyester

B

Terry cloth

Our absorbent terry cloth serves as the absorbent core. Any moisture is absorbed by the terry cloth.

40% Micromodal

40% cotton

20% polyester

C

Outer fabric membrane

There is a water-impermeable membrane on the outside. It prevents the leakage of moisture, thereby preventing the formation of sweat stains.

72% polyamide

13% elastane

15% polyurethane
